Workshop Leaders

ANTONY BROWN

TOM HAHN

Be one of 14 individuals to join the Ecosa Institute for this exciting new workshop intensive that integrates cutting edge urban design principles into an experiential project based learning intensive.

Participants of all backgrounds are welcome.

There is a recognition that we need to treat the issues in our cities comprehensively. We advocate a systems approach to solve the social, economic and environmental problems we face; we must reform all the systems and linkages to create exciting livable urban environments.
